

AMENDMENTS TO THE SPECIFICATION

Please replace page 4, lines 23-25 with the following paragraph rewritten in amendment format:

In the example of an embodiment shown, the flow channels 10 can be formed in an element 12 which is inserted into an outer cylinder 11. For this, the outer cylinder has a circumferential inner rib 28 on which the element 12 with a shoulder ~~[[29']]~~ 28' rests.
